## MARINA PLAN

## MARINA LOCATION

The ACI marina is located at the end of the Rijeka ("river") Dubrovačka inlet, whose width varies between 170 and 400 metres all the way to the easily identifiable monastery in the village of Rožat. The landmark to be used when approaching the mouth of Rijeka Dubrovačka is the islet of Daksa, which can be rounded from any side. On the northern cape of the islet there is a lighthouse (Fl W 6s 7m 10M). The exact position of the lighthouse is 42°40.2' N 18°03.5' E. The entrance to the mouth of Rijeka Dubrovačka is marked by a lighthouse on Cape Kantafig (Fl R G 2s 8m 4M). The route following the riverbed leads to the Mokošica lighthouse (Fl R 3s 6m 4M) and on to ACI Marina Dubrovnik. From Rožat the inlet becomes narrower and shallower. The water depth is 3-5 metres. The marina is protected from river currents by a long breakwater, and at night it is floodlit.

## MARINA AMMENITIES

The marina is well equipped with amenities which include: reception desk with exchange office, ATM, Parking lots, toilet and shower facilities opened 24h, restaurant, grocery store, laundry. Fuel station for boats and one for road vehicles. You can also enjoy a swimming pool and a golf range. Free WI-FI is available across the marina.
